

Mobile and Barcode

The Proteus Mobile module transfers PM/DM work orders from Proteus MMX to your iPhone®, iPad®, Android® based phone/tablet or devices running Windows Mobile® 6.5. This allows users to:

- Receive and close work orders on a mobile device
- Create new work orders on the job
- Update labor hours and parts quantities used
- Update existing PM/DM work orders
- View history

The Mobile module frees maintenance staff from paperwork, giving them more time to do the work they are hired for.

The Barcode module makes it easy to label and track equipment, inventory, employees and work orders. Users can barcode work orders to collect information on PM and DM work orders in the field.

Use the Barcode and Mobile modules together to:

- Update equipment runtime
- Adjust physical inventory
- Update tasks, parts & labor on PM and DM work orders
- Scan equipment to select work orders
- Reduce entry errors
