Proteus MMX Inspection Application

The costs of complying regulatory requirements impact both facility capital and operating costs. Maintenance records play a large part in compliance and reporting requirements to regulatory agencies. Automated inspections reports save time and provide accurate records to document compliance. With Proteus MMX Inspection, you have easy insight into tasks, due dates, progress and more – helping you to do more with less.

1. Identify & Track Assets

- Define the types of assets to track or inspect.
- Create & edit specific asset records

2. Schedule & Assign Inspections

- Create checklist forms to be completed during inspections.
- Define recurring and on-demand inspections.
- Assign inspection tasks to employees

3. Inspect & Report

- Identify assets and complete assigned inspection checklists.
- Capture and resolve non-compliance issues.
- Use Key Performance Indicators (KPI's) to analyze data and create reports.

Integrated Software for Safety

Proteus CMMS is integrated with Brady Corporation's LINK360 software for lockout tagout and confined space software. The integrated software streamlines maintenance procedures and assists with maintaining compliance with OSHA regulations including adequate process and regular inspections. It puts worker safety as the highest priority.

Brady LINK360 software enables users to create, scale, update and validate visually instructive safety procedures using desktop and mobile devices. The software provides an easy way to keep safety procedures accurate, compliant and sustainable across facilities.
