

MOBILE & BARCODE

The Proteus MMX Mobile application lets you update and view work orders on your smart phone or tablet - anywhere, any time.

The Proteus Mobile module transfers PM/DM work orders from Proteus MMX to your iPhone®, iPad®, or Android® Mobile devices.

This allows users to:

- Receive and close work orders on a mobile device
- Create new work orders on the job
- Update labor hours and parts quantities used
- Update existing PM/DM work orders
- View history

The Mobile module frees maintenance staff from paperwork, giving them more time to do the work they are hired for.

Barcode Application

The Barcode application makes it easy to label and track equipment, inventory, employees and work orders. Users can barcode work orders to collect

information on PM and DM work orders in the field.

Use the Barcode and Mobile application together to:

- Update equipment runtime
- Adjust physical inventory
- Update tasks, parts & labor on PM and DM work orders
- Scan equipment to select work orders
- Reduce entry errors
